

Competency goes digital – leading the charge in credential management

StayLive has partnered with JNCTN to develop an industry-wide, cloud-based competency tool – known as the StayLive Competency Tool (SCT). The SCT is a portable, secure digital record of your competencies and will be accepted across all generation sites and accessible wherever you are.

From 1 July 2025, all contractors and employees in the electricity generation industry will be moving to using the SCT as the new standard to verify training. The Green Passbook is being phased out and will not be accepted after 31 December 2025.

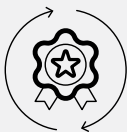

SCT BENEFITS

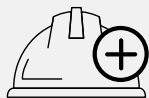

REAL TIME VERIFICATION

Ensures that all workers and contractors have the necessary training qualifications and competencies to perform their work safely.

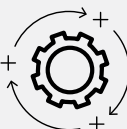

AUTOMATED CREDENTIAL MANAGEMENT

Streamlines issuing, managing, and verifying credentials, reducing administrative burdens.

ENHANCED SAFETY

Reduces the risk of accidents by ensuring that qualified individuals only are assigned to specific tasks.

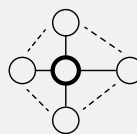

OPERATIONAL EFFICIENCY

Improves overall operational efficiency by ensuring that all personnel are always qualified for their roles.

USER-FRIENDLY INTERFACE

Provides easy access and management of credentials from anywhere, at any time.

SYSTEM INTEGRATION

Facilitates easy data synchronisation and avoids duplication by integrating easily with existing systems.

ENHANCED DATA SECURITY

Moving and managing your training information online means stronger security, improved privacy, and reduced risk of loss, theft, or unauthorised access.

COST-EFFECTIVE

There is an annual subscription cost of \$120 per person for access to the SCT. This should be treated as a standard cost of doing business within the generation industry and incorporated into your annual operating expenses.

WHAT OR WHO IS STAYLIVE?

Founded in 2011 by New Zealand's five largest electricity generators, StayLive is dedicated to improving health, safety, and wellbeing outcomes in the industry.

WHAT'S NEXT?

- **StayLive members:** Generation providers are at various stages of implementing the SCT. All generation providers are currently working to be "Ready to receive" the SCT over the coming weeks, look out for more information from the generation providers you work with around timings.
- **Next steps:** Communications are currently being shared across the industry so please ensure you are reading these and are aware of what you need to do to transition to the SCT. You'll find all the information you need on the [SCT webpage](#).
- **Contact details:** Talk to your key contacts at the generators listed below if you have any other questions.
- **Registration:** If you haven't yet signed up now is the time to do so. Please follow the instructions below for registering.
 - If you are an organisation decision maker (including sole proprietors) who has **not yet registered**, please fill in a form in the JNCTN Help Centre first so that your company can be set up prior to you registering. Go to [StayLive Competency Tool \(SCT\) Onboarding – JNCTN](#) for the form and instructions.
 - If you are an organisation decision maker (including sole proprietors) who has **already registered** but need to complete your profile or want to check registration details, please log into your SCT account [here](#) or contact our the JNCTN Support Hub if you need help logging in at support@jnctn.nz

WANT MORE INFORMATION?

If you have any questions around the SCT and how it will work for your organisation, talk to the relevant key contacts below.

- **To learn more** about the SCT and for further instructions around registration and onboarding visit: [StayLive Competency Tool](#)
- **For technical support** around registration or existing profiles contact the JNCTN support team at support@jnctn.nz
