SCT: Credential checks made easy

Contractors show their **SCT app** or **physical card** on arrival, or when requested.

**SCAN.** You **scan the QR code** to verify their credentials.

CHECKED. Credentials are then checked against the site **specific requirements**.

VERIFIED. A green result means they're **good to go.**

Josh Wilson

Confidence with real-time, consistent checks across every site.

The StayLive Competency Tool (SCT), powered by JNCTN, is the new standard for verifying training and identity credentials across New Zealand's electricity generation industry, replacing the Green Book.

Scan the code to find out more.
